AMENDMENTS TO THE CLAIMS

CLAIMS:

1. (Currently Amended) A microscope slide composition comprising:
 - a) a substrate with a surface comprising first and second assay locations separated from each other by a physical border, wherein said assay locations have discrete sites, said sites separated by a distance of less than 50 μm ; and wherein said substrate comprises the dimensions of a microscope slide; and
 - b) a population of microspheres comprising at least a first and a second subpopulation, wherein said first subpopulation comprises a first bioactive agent and said second subpopulation comprises a second bioactive agent, wherein said microspheres are randomly distributed ~~on~~ at said discrete sites on said surface.
2. (Currently Amended) ~~A~~The composition according to claim 1, wherein said sites are separated by a distance of less than 25 μm .
3. (Currently Amended) ~~A~~The composition according to claim 1, wherein said sites are separated by a distance of less than 15 μm .
4. (Currently Amended) ~~A~~The composition according to claim 1, 2 or 3, wherein said sites are separated by a distance of at least about 5 μm .
5. (Canceled).
6. (Previously presented) The composition according to claim 1, wherein the distance between centers of a first and second microsphere of said first subpopulation is at least 5 μm .
7. (Previously Presented) The composition according to claim 6, wherein the distance between said first and second microsphere of said first subpopulation is less than about 100 μm .
8. (Canceled)
9. (Canceled)
10. (Currently Amended) ~~A~~The composition according to claim ~~9~~7, wherein the distance between a first and second microsphere of said first subpopulation is less than about 50 μm .

Appl. No. : 09/782,588
Filed : February 12, 2001

11. (Currently Amended) ~~A~~The composition according to claim 97, wherein the distance between a first and second microsphere of said first subpopulation is less than about 15 μm .

12. (Currently Amended) ~~A~~The composition according to claim 97, 10 or 11, wherein the distance between said first and second microsphere of said first subpopulation is at least about 5 μm .

Claims 13-17 (Canceled).

18. (Currently Amended) A method for making a microscope slide composition comprising:

a) providing a substrate with a surface comprising first and second assay locations separated from each other by a physical border, wherein said assay locations have discrete sites, said sites separated by a distance of less than 50 μm , and wherein said substrate comprises the dimensions of a microscope slide; and

b) randomly distributing a population of microspheres comprising at least a first and a second subpopulation at said discrete sites, wherein said first subpopulation comprises a first bioactive agent and said second subpopulation comprises a second bioactive agent.

19. (Currently Amended) The method according to claim 2618, wherein said wells discrete sites are separated by a distance of less than 25 μm .

20. (Currently Amended) The method according to claim 2618, wherein said wells discrete sites are separated by a distance of less than 15 μm .

21. (Previously presented) The method according to claim 18, wherein the ratio of said first and said second subpopulation is at least 1 : 36.

22. (Previously presented) The method according to claim 18, wherein the ratio of said first and said second subpopulation is at least 1 : 100.

23. (Previously presented) The method according to claim 18, wherein the distance between the centers of a first and second microsphere of said first subpopulation is at least 5 μm .

24. (Previously presented) The method according to claim 18, wherein the distance between the centers of a first and second microsphere of said first subpopulation is at least 15 μm .

Appl. No. : 09/782,588
Filed : February 12, 2001

25. (Previously presented) The method according to claim 18, wherein the distance between a first and second microsphere of said first subpopulation is at least 50 μm .
26. (Canceled)
27. (Previously presented) The method according to claim 18, wherein said discrete sites are wells.
